Portable battery	Battery insufflator for uterine work
Weight	9KG (including case)
Software	Integrated Smart Inspector comparing real-time against saved images
File format	JPEG/MPEG4
WIFI	Built in
Bluetooth	Built in

Customer Feedback

I use the MEDView daily in pre and post-race scoping of racehorses. It has been a very useful tool in assisting owners and trainers in decision-making. I can quickly send a short video or picture via my phone - a picture paints a thousand words. The 2.8mm tracheal wash channel sealed the deal in my decision making. The scope is very simple to use and I am extremely happy with the product and service.
