

MEDVIEW EXCELLENCE IN A CLINIC OR HOSPITAL SETTING

Bespoke in its design, the trolley is built to facilitate efficient use of the MEDView endoscopes for different clinical procedures within a hospital environment. Rugged wheel design enables you to swiftly transfer all your diagnostic scopes from a treatment room to an in-patient stable.

The HDMI Pro box is small but powerful. It can store 26GB of data and enables you to link your scope to the screen for split screen functionality, WIFI/Bluetooth sharing and more.

27-inch touchscreen with superb quality and split screen functionality - it's a great teaching/training aid.

The HDMI Pro box passes the surgical quality imaging from the scopes through to the touchscreen.

The rugged and mobile wheels are suitable for all surfaces and can be locked in position.

Bespoke endoscope holders allow for easy access and interchangeability.

Drawer and shelf storage for MEDView equipment and accessories.

The ergonomic handle makes the trolley easy to move.
